#16 

Hallo zusammen,

ich erreiche die Website Loxberry nicht mehr nach dem ich das 1-Wire-NG Plugin installiert habe.

Zunächst habe ich einen Loxberry neu aufgesetzt (2.0.0.3), dann upgegradet auf 2.0.1.3 und dann das 1-Wire-NG Plugin installiert. Alles lief ohne Probleme. Nach dem Neustart, der nach der Installation gefordert wurde, ist die Website nicht mehr erreichbar.

Ich habe daraufhin Loxberry wieder neu aufgesetzt usw. -> gleiches Verhalten.

Ich habe die o.g. Befehle ausgeführt

- **`/opt/loxberry/sbin/loxberryupdatecheck.pl querytype=prerelease update=1 nofork=1`**

```
root@loxberry:~# /opt/loxberry/sbin/loxberryupdatecheck.pl
querytype=prerelease update=1 nofork=1
Subroutine vers_tag redefined at
/opt/loxberry/sbin/loxberryupdatecheck.pl line 1157.
```

```

Schau mal, ob es den Ordner `/opt/loxberry/log/system_tmpfs/apache2/` gibt und ob es dort ein Log gibt.  
Evt. fehlt das Verzeichnis, dann startet Apache nicht.

lg, Christian

**LoxBerry/Plugin Support:** Wenn du einen Begriff in meiner Antwort nicht auf Anhieb verstehst, bitte nicht gleich rückfragen, sondern erst die Suche im [LoxWiki](#) und bei Google bemühen.

**PN/PM:** Ich bevorzuge die Beantwortung von Fragen in öffentlichen Threads, wo andere mithelfen und mitprofitieren können. Herzlichen Dank!

Danke für deine Antwort Christian,

Ergebnis:

```
root@loxberry:/opt/loxberry/log/system_tmpfs/apache2# ls -all  
total 0  
drwxr-xr-x 2 loxberry loxberry 40 Apr 23 13:10 .  
drwxr-xr-x 5 loxberry loxberry 160 Apr 23 15:00 ..
```

kein Log, aber das Verzeichnis existiert.  
IG Daniel

Teils gibt es Probleme bei Neuaufgesetzten Loxberrys bezgl. der Systemupdates. Setze den Loxberry nochmal neu auf. Lasse ihn 1 Stunde in Ruhe. Richte ihn ein und starte ihn neu. Führe das Update auf 2.0.1.3 durch. Warte wieder. Starte dann neu und installiere dann das Plugin.

---

Miniserver; KNX; Vitogate; EnOcean (EnOceanPi); Loxone Air; Caldav-Kalenderanbindung; RaspberryPi und für keine Frickellösung zu schade :-)

Hey svethi,  
ich habs jetzt über Nacht ganz langsam gemacht aber es ist genau der gleiche Fehler. Keine Website erreichbar nach Installation des 1-Wire Plugins.
